SPAR-Marathon

SR-1 Hot Line Safety Rail System

Provides the ultimate safety at the hot line loading area and roof edge. Meets OSHA* requirements withstanding a force of 200 lbs. in any direction.

The kits consists of:

- 8' front section
- 5' side sections (2 required)
- ballast counterweights (6 required)
- connecting rods (2 required)

Available option:

- hot pipe holding bracket

The bottom cross sections (toe boards) are welded steel and does not require additional wood as a bottom cross section.

SR-2 Safety Rail System

Unlimited applications wherever a sturdy portable safety rail is needed. Allows work to be done next to the roof edge. Can also be used as a hot line safety rail or around hoisting equipment. Meets OSHA* requirements withstanding a force of 200 lbs. in any direction.

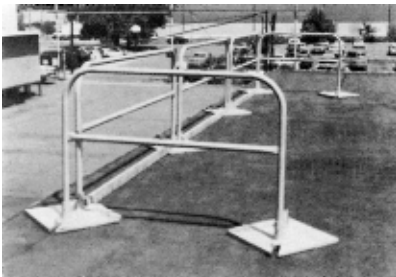

Sold individually:

- 10' safety rail
- 8' safety rail
- 5' safety rail
- base plate with 4 pins
- base plate mover dolly
- 2 x 6 wood cross section (toe board)

Base Plate Mover Dolly

- easily moves & positions heavy base plate

*Current OSHA at time of printing. For OSHA regulations please call OSHA or our office.

SPAR-Marathon

Perimeter Warning Line System

Acts as a visual warning for hazard areas etc. Meets OSHA* requirements. The stanchion easily slips out from the weighted base plate for easy transportation and storage.

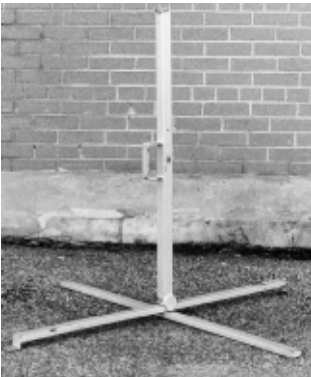

Sold individually:

- base plate and stanchion
- 100' of flags

Four base plates and stanchions are recommended for 100' of flags.

Folding Perimeter Warning Line System

This folding option is completely self contained with no removable parts. Folds together easily into a very compact unit for carrying and storage. Sold individually. Four are recommended for every 100' of flags.

*Current OSHA at time of printing. For OSHA regulations please call OSHA or our office.

PROTECTIVE ROOFING PRODUCTS LTD.

PR 100 Guardrail System

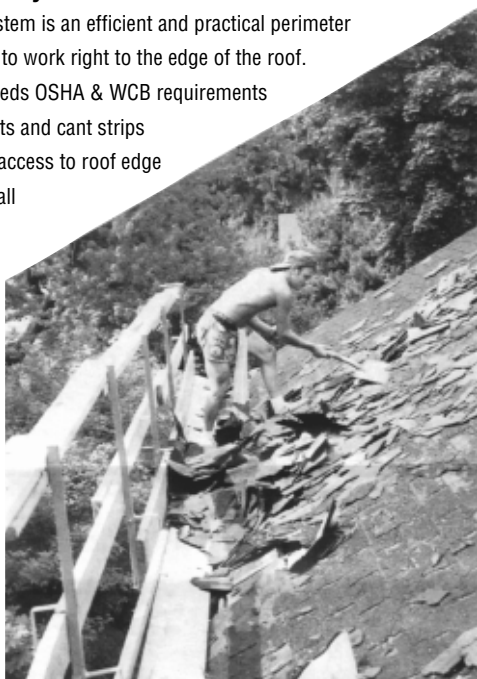

The PR 100 Guardrail system is an efficient and practical perimeter guardrail that allows you to work right to the edge of the roof.

- PR 100 meets and exceeds OSHA & WCB requirements
- Accommodates: parapets and cant strips
- Provides unobstructed access to roof edge
- PR 100 are easy to install

PR 20 Eave Catchguard

The final answer for sloped roofing. An edge protection system that increases production.

The ultimate platform guardrail system that sets up in minutes and provides the roofer with maximum fall protection.

PROTECTIVE ROOFING PRODUCTS LTD.

PR 600 Mobile Fall

Protection System For Flat Roofs

The PR 600 is a Fall Arrest Anchoring System designed for use on flat roofs. The PR 600 clamps onto any three or four wheel utility roof cart. Thus allowing the PR 600 to be moved along the roof by pulling the cart to the desired working location, adjusting

ballast weight, which sets the system in place, providing a fall safe working area. The PR 600 meets O.S.H.A. compliance 1926.502D

PR 2000 Safety Work Platform

For Steep Slope Roofing

The PR 2000 Work Platform is a platform that suspends from the roof and replaces any conventional scaffolding for roofing work, only weighs 22 lbs. per bracket and allows the installation of soffit, fascia, gutters or cornice work. The PR 2000 provides a safe working platform that provides a

waist high starting level, staging that prevents debris from falling to the ground. Tear-off is quicker and clean up time is considerably reduced. The PR 2000 provides a strong base for the feet of a ladder while working up the courses of a roof.

The PR 2000 Safety Work Platform permits the roofer to concentrate on the productive aspects of roofing, resulting in a project with better quality and greater customer satisfaction, meeting and exceeding the requirements of Federal O.S.H.A. & Canadian W.C.B.

SERVICE IS OUR SPECIALTY • SPAR-Marathon

Welder's Glove

Completely made of selected shoulders split leather
Two-piece back • Fully lined • Wing thumb

Rubber Dot Cotton Glove

Rubber provides extra grip for easy pick-up

All Cotton
